

Task 1 : windows installation

Installation of windows 7

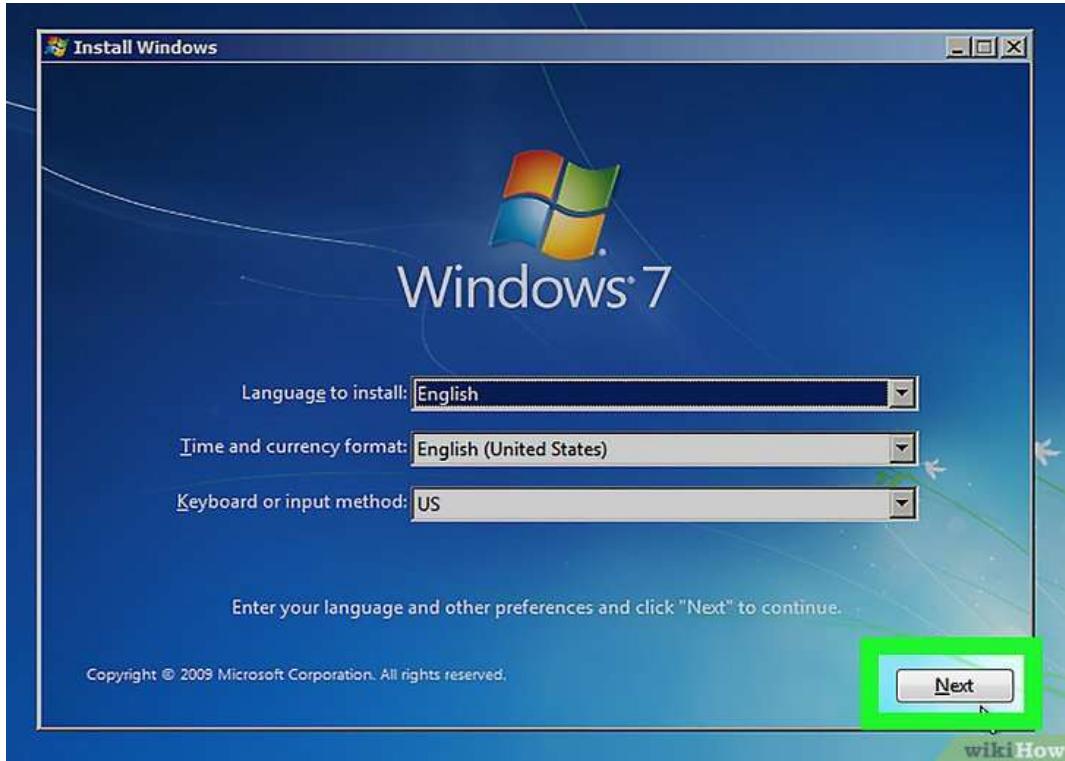

Back up your data, create bootable media (DVD/USB), change your computer's boot order in BIOS to start from it, follow the setup prompts (language, license, custom install), choose your partition, and then complete the user account, password, and update settings.

Step 1: Turn off the computer by choosing the shut-down option in your current operating system, or hold the power button until the computer powers off.

Step 2 :Start your computer from the disc, After you have placed the disc into the disc drive, start your computer. When the computer starts, press a key if you are asked if you would like to boot from the disc by pressing any key. After you choose to start from the disc. Windows Setup will begin loading.

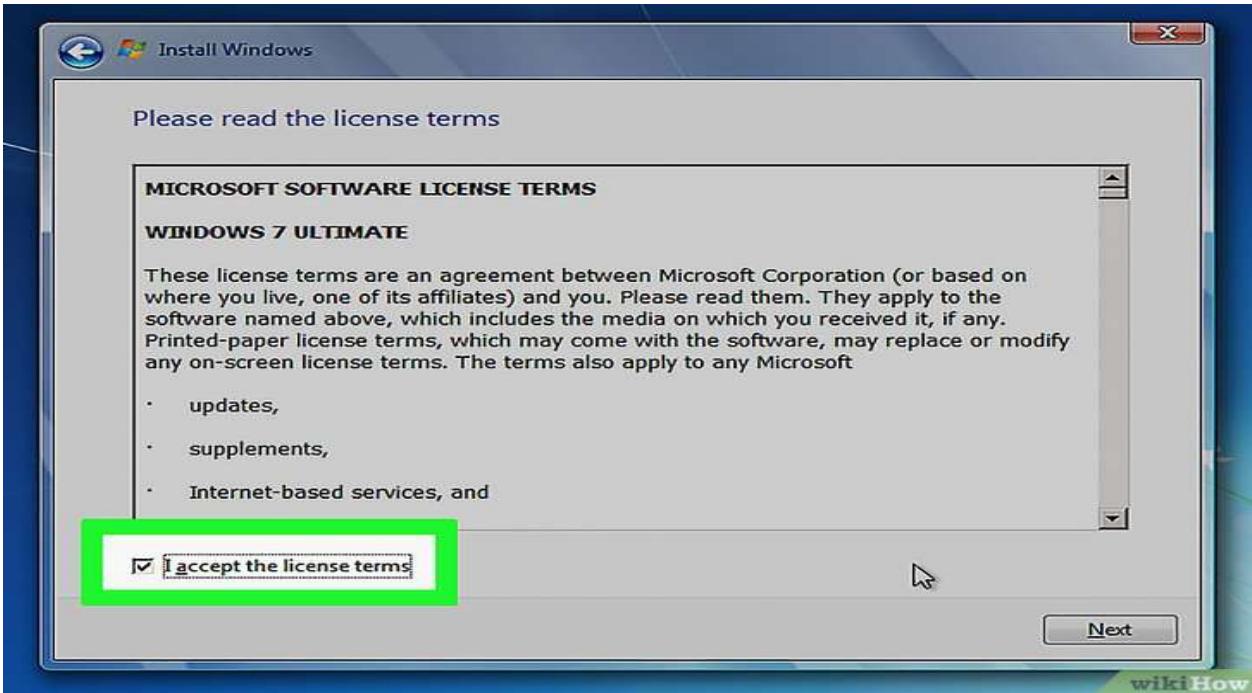

- If you are not asked to boot from the disc, you may have done something wrong. Retry the previous steps and make sure you have selected the correct drive in the BIOS boot menu.

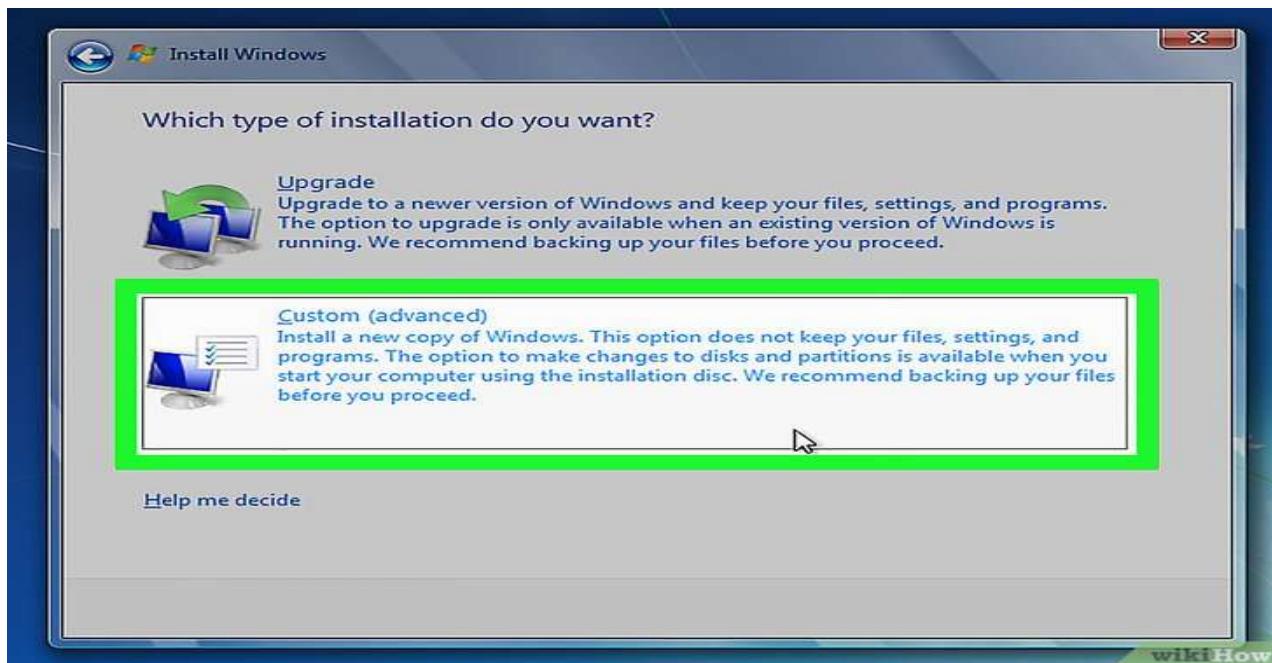

Step 3: Choose your Windows Setup options. Once Windows Setup loads, you'll be presented with a window. Use the drop-down menus to select your preferred language, keyboard type, and time/currency format, then click **Next** in the lower-right corner.

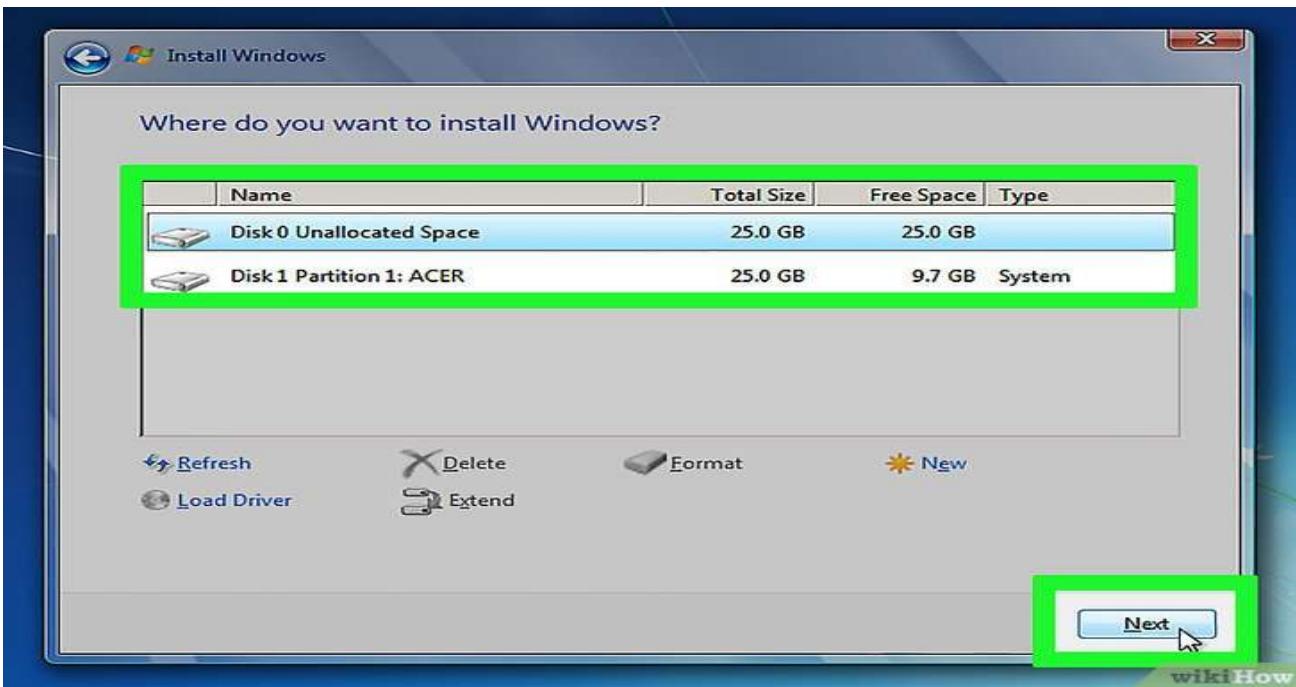

Step 4 : Click the Install Now button. It's the blue button in the center of the screen.

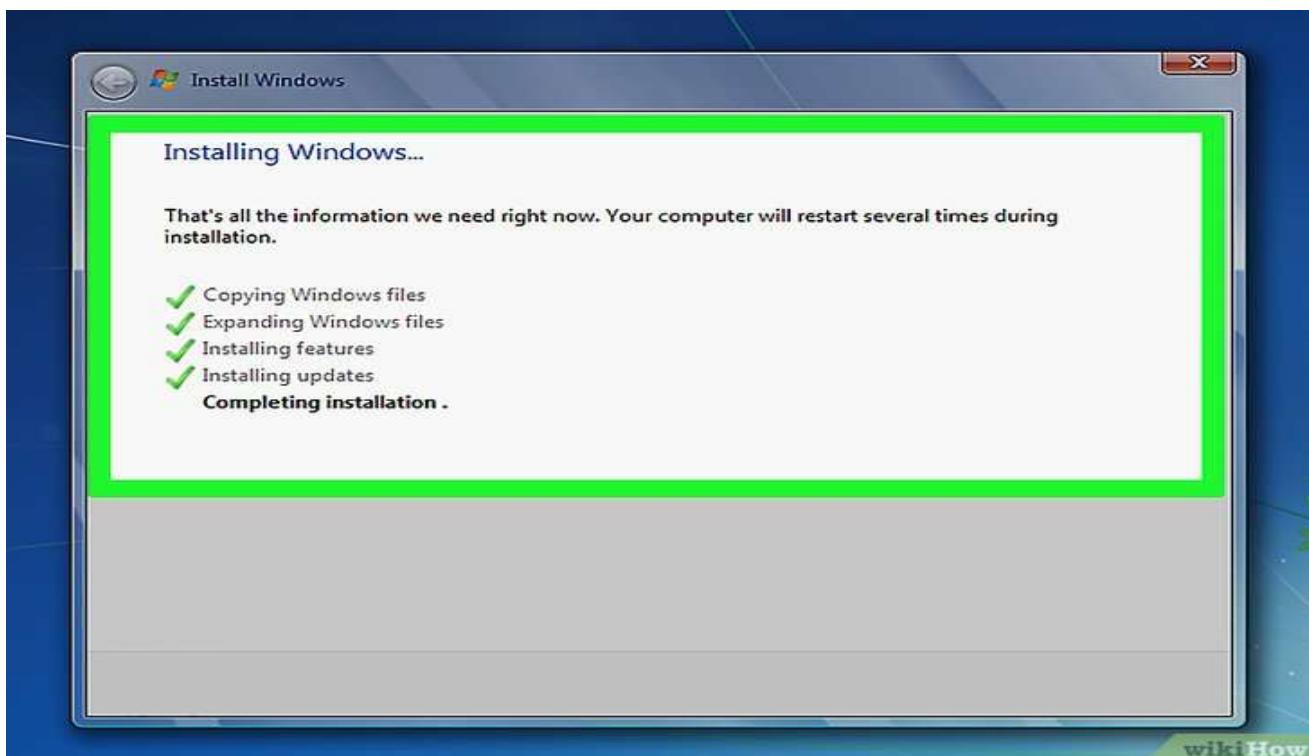

Step 5 : Accept the License Terms. Read over the Microsoft Software License Terms. Then click the checkbox next to *I accept the license terms*, and click **Next** in the lower-right corner.

Step 6: Select the Custom installation. This option allows you to do a clean install of Windows 7. This will erase all your files on the installation drive.

Step 7: Select a hard drive and partition you want to install Windows on. A hard drive is a physical part of your computer that stores data, and partitions "divide" hard drives into separate sections. Click the hard drive or partition you want to install Windows 7 on.

Step 8: Install Windows on your preferred hard drive and partition. Once you've decided on where to install Windows, select it and click **Next**. Windows will begin installing. Your computer may start and restart several times during the installation process.

To begin, click your user name

A screenshot of a Windows logon screen. A green rectangular border highlights the password input field. The screen shows the Windows logo, the user name "wikihow", a "Type your password" placeholder, and a password input field with a cursor. To the right of the input field are two buttons: a green arrow pointing right and a blue question mark icon.
